

ACROSS THE WALL HARDWARE KIT

INVISIGLIDE

InvisiGlide Hardware Kit

Glide quietly and smoothly into contemporary, trackless style with Renin's new InvisiGlide™ Across The Wall Hardware Kit with Soft Close technology.

We have revolutionized the way a sliding door looks and functions by eliminating the bulky, noisy and difficult to assemble hardware. Renin's patented InvisiGlide™ hardware kit consists of 5 beautifully finished and adjustable wall mounted disks and rear mounted aluminum track which mounts directly to your door.

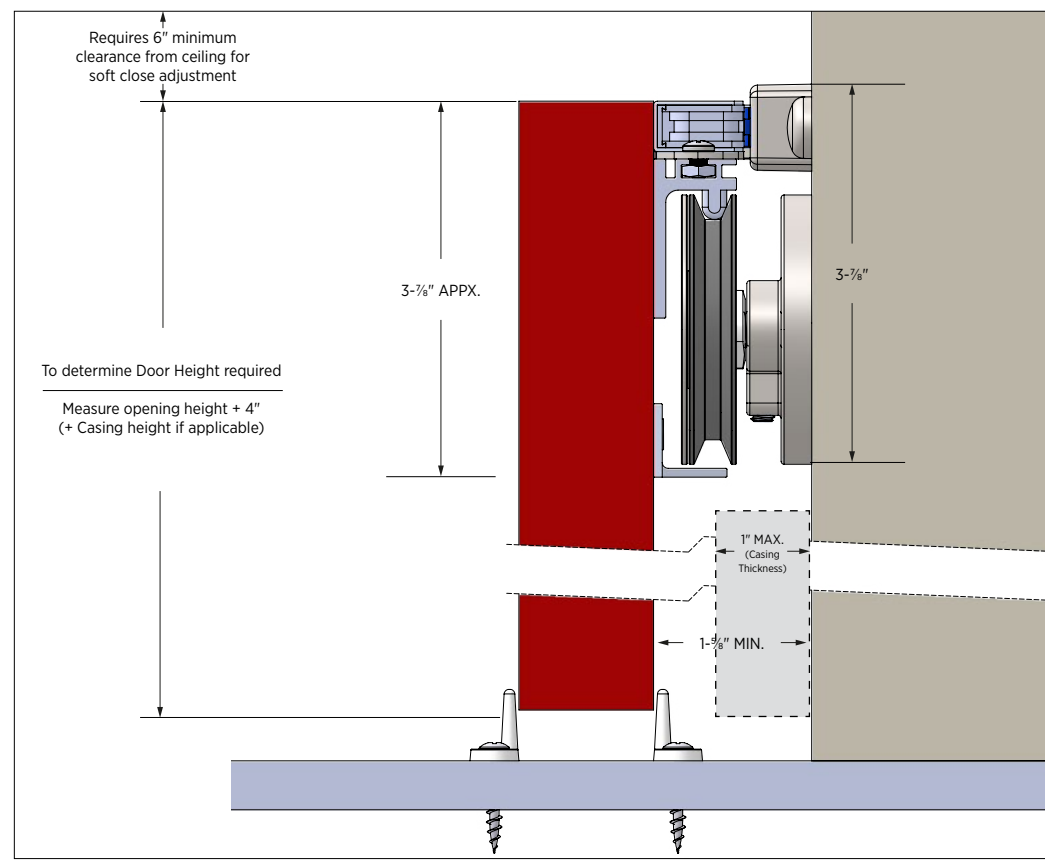

InvisiGlide™ quietly and effortlessly moves across the wall with our micro-adjust discs which move in and out; and up and down to ensure doors run smoothly when walls are uneven. This hardware kit not only disappears behind your door but does it quietly and smoothly with our soft close technology.

- ←
Single door floats across the wall along 5 mounted discs
- KIT INCLUDES**
- Behind the door mounted track
 - 5 wall mounted discs with aluminum cover plates
 - Integrated soft close mechanism with safety catch
