Find the Perfect **CLOSET DOOR** for **YOUR SPACE**

Closets do more than store our belongings, they help shape how our homes look, feel, and function. Whether it's a hallway linen closet, a primary bedroom closet, or a pantry in a high-traffic space, the right door brings balance between design and daily use.

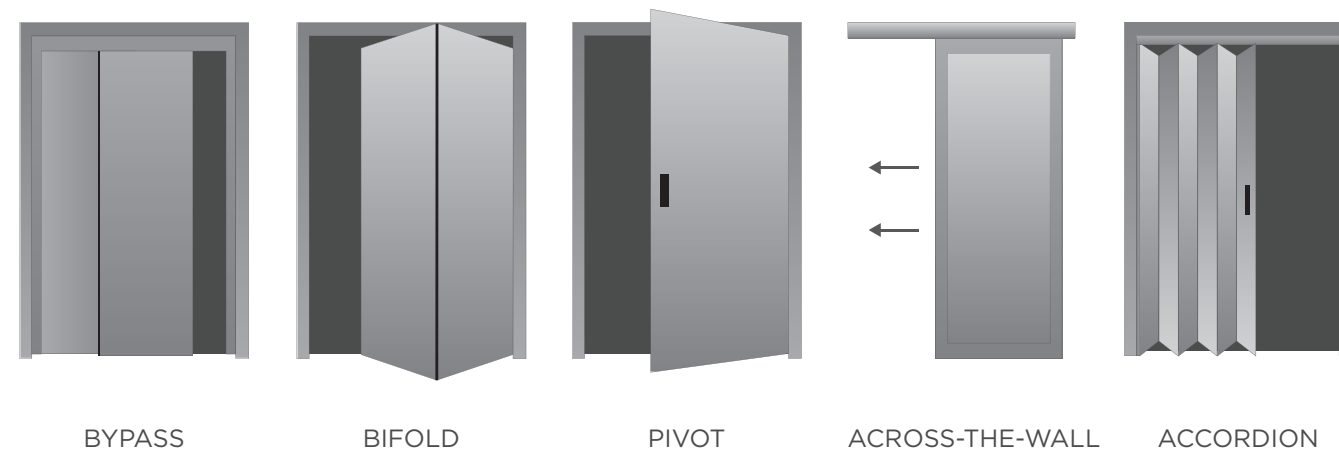

Do you lean toward sleek modern options or something more traditional and timeless? Are you working with a tight hallway, or do you want full access to your wardrobe in one smooth motion? Wherever your needs and style land, we'll help you find the right fit.

Choosing Your DOOR TYPE

Not all closet doors open the same, and that's a good thing. From space-saving sliders to statement-making pivots, each door type offers a unique blend of style and functionality. Explore the options below to find the perfect fit for your space, your storage needs, and your design aesthetic.

DOOR TYPE	HOW IT WORKS	BEST FOR
Bypass Doors	Two or more panels slide past each other on a track	Tight spaces where swing clearance is limited
Bifold Doors	Panels fold and stack to the side on a track	Openings where full access is important
Pivot Doors	Hinged doors that rotate open on a central or offset pivot	Larger rooms or luxury closets with ample swing clearance
Sliding Door Systems	Doors glide along a top-mounted track	Multi-use spaces, shared rooms, or minimalist design setups
Accordion Doors	Flexible, folding panels collapse neatly to one side	Utility spaces, laundry rooms, or anywhere compact functionality is key

Choosing Your New CLOSET DOOR

START WITH YOUR SPACE

- TIGHT ON ROOM?**
Sliding Bypass & Accordion Doors are ideal for small spaces since they don't swing out into the room
- NEED FULL ACCESS?**
Bifold & Accordion Doors push to the side so you can reveal the entire closet at once
- HAVE ROOM TO SWING?**
 Consider **Pivot Doors** if there's clearance for traditional movement

CONSIDER FUNCTION

- EVERYDAY USE?**
 Bedrooms and living areas may need smoother tracks or mirrored/specialty finishes
- STORAGE ACCESS?**
 Laundry rooms, pantries, and utility closets often benefit from simple **bifold** or **bypass** designs

KNOW WHAT FITS

- STANDARD OPENINGS**
 Range from 24" to 72" wide and 80" to 96" tall - most in-stock doors will fit these opening sizes
- CUSTOM SIZES & FINISHES**
 Available for oversized or irregular openings and design-forward spaces - just ask for a special order quote
- EXTRA TRACKS & PANELS**
 Bypass doors typically use 2 overlapping panels, but wider openings may require 3 or 4.

- As a guide:**
- 2 panels for openings up to 108"
 - 3 panels for 108-144"
 - 4 panels for 144-192"

For larger setups, consider extra tracks to improve access and reduce panel overlap.

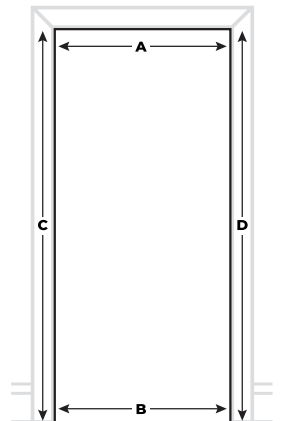

HOW TO MEASURE YOUR CLOSET OPENING

Measure the finished opening to the nearest 1/8". Always measure the opening, not the old door. Choose a door that "fits opening" using these measurements.

BYPASS DOORS & ACROSS-THE-WALL DOOR SYSTEMS

Use the shortest height and largest width measurement:

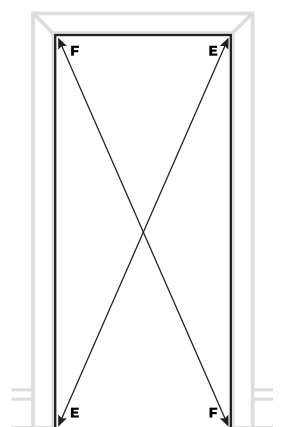

- Measure Width at Top (A) and Bottom (B) > use larger
- Measure Height Left (C) & Right (D) > use shorter

BIFOLD, PIVOT, & ACCORDION DOORS

Use the smallest height and width:

- Measure Width Top (A) & Bottom (B) > use smaller
- Measure Height Left (C) & Right (D) > use smaller
- Measure Diagonals (E & F)

NOTE: If E & F has more than a 1/2" difference, your opening is not square and it should be fixed before installation for smooth operation.

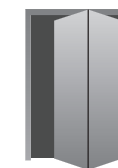

Accordion door tracks and panels can be trimmed, choose a door equal or larger than your opening.
